Leadership Education in Neurodevelopmental and Related Disabilities (LEND) programs provide interdisciplinary training to enhance the clinical expertise and leadership skills of professionals dedicated to caring for children with neurodevelopmental and other related disabilities including autism. Since their inception, LENDs have trained thousands of individuals from a wide variety of disciplines to work with and provide the best possible services and supports for children with developmental disabilities and their families. The focus of these training programs has always been on children with a wide range of intellectual and developmental disabilities and special health care conditions, especially medically fragile children with multiple or complex challenges. More recently an additional focus has been added to this network’s mission. Authorized in December 2006 and appropriated in December 2007, the Combating Autism Act of 2006 (Public Law 109-416) brought additional funds to the LEND program to promote education, early detection, and intervention in autism spectrum disorders. Trainees in LEND programs participate in academic, clinical, leadership and community opportunities. They receive training in cultural and linguistic competence using a family centered approach.  

**Program Profile**

MCHB currently funds 43 programs at universities and children’s hospitals across the nation with annual grant awards totaling approximately $28 million. In addition, a Combating Autism Act Interdisciplinary Training Resource Center is funded at approximately $700,000 per year. The next competition for LEND is in FY 2016.

**Program Impact**

- **Trainees.** In FY2011, the LEND training program trained 1,311 long-term trainees, 2,782 medium-term trainees, and 9,269 short-term trainees. Over 20% of long-term trainees are from underrepresented racial groups and almost 9% are from underrepresented ethnic groups.

- **In FY 2011, over 78% of LEND program graduates (5 years following completion of program) are engaged in work related to MCH populations and almost 82% demonstrated field leadership in academic, clinical, public health practice, and/or public policy and advocacy activities.

- **Faculty.** LEND faculty mentor students in exemplary MCH public health practice for children with disabilities, provide continuing education on the latest research and practice to professionals currently in the field, and develop innovative curricula on interdisciplinary leadership practices for children with ASD and developmental disabilities.

- **Title V.** In FY 2011, LEND training programs reported collaborating with State Title V (MCH) agencies or other MCH-related programs on over 6,100 activities in areas of service, training, continuing education, technical assistance, product development and research.

Vermont
University of Vermont, Burlington

Virginia
Virginia Commonwealth University, Richmond

Washington
University of Washington, Seattle

Wisconsin
University of Wisconsin, Madison

West Virginia
West Virginia University, Morgantown
The Division of MCH Workforce Development provides national leadership and direction in educating and training our nation’s future leaders in maternal and child health. Special emphasis is placed on the development and implementation of interprofessional, family-centered, community-based and culturally competent systems of care across the entire life course because experiences in one life stage shape health in later stages.

The Division, part of HRSA’s Maternal and Child Health Bureau, supports programs established in federal legislation (Title V of the Social Security Act and the Combating Autism Act) to complement state and local health agency efforts. The Division collaborates with state MCH programs, academic institutions, professional organizations, and other health training programs of the federal government, to ensure that MCH initiatives are unique and based on evidence-based practices.

In FY2013, the Division of MCH Workforce Development awarded 107 training grants, an investment of $42.4 million. Grants are awarded to develop trainees for leadership roles in the areas of MCH teaching, research, clinical practice, and/or public health administration and policy making.

2012-2020 NATIONAL GOALS

**MCH WORKFORCE & LEADERSHIP DEVELOPMENT**
Address current and emerging MCH workforce needs by engaging and providing training for and support to MCH leaders in practice, academics, and policy.

**DIVERSITY & HEALTH EQUITY**
Prepare and empower MCH leaders from diverse communities to promote health equity, wellness, and reduce disparities in health and healthcare.

**INTERDISCIPLINARY / INTERPROFESSIONAL PRACTICE**
Promote interdisciplinary/interprofessional training and practice and interorganizational collaboration to enhance systems of care for MCH populations.

**SCIENCE, INNOVATION & QUALITY IMPROVEMENT**
Generate and translate new knowledge for the MCH field in order to advance science-based practice, innovation, and quality improvement in MCH training, policies, and programs.
