Watching STAT 208 Lectures in iTunes 11.x

**Note 1:** Instructions for viewing the lectures in older versions of iTunes (10.x and earlier) and on iOS devices (iPhone, iPod Touch, iPad) may be found later in this document.

**Note 2:** While the following screenshots are from a Macintosh computer, the windows and features are nearly identical to those on a Windows computer.

2. Download the lecture files from iTunes U, STAT 208 Blog, or STAT 208 area in Blackboard (links to all are sources are available in Blackboard).
3. If the lecture files do not automatically appear or open in iTunes, you’ll need to add them to your library. Open iTunes and go to File ➔ Add to Library… (Macintosh, left image) or “Menu icon” ➔ Add File to Library… (Windows, right image) to browse for the file, select it, and add it to iTunes. Repeat this for each of the lecture files.
4. Once the lecture files have been added to iTunes, you should navigate to the one you want to view and double-click it to begin playing the lecture.

5. After double-clicking the desired lecture, it should begin playing, and you should see the textbook cover displayed in the status area of the main iTunes window. Command-click (Mac) or control-click (PC) the cover image to view the lecture in a larger window.

(If you just click, you'll see the textbook cover, and not the lecture slides.)
6. You can use the standard windows control options (drag bottom-right corner) to enlarge this window and drag the title bar locate it on your screen as desired.

7. To jump to a specific slide in the lecture, you may use the “Chapters” menu (Mac only) or the “Chapters” menu button on the play-back controls (Mac & Windows) to choose the desired slide. This is extremely useful if you just want to review a specific topic from your notes.
Watching STAT 208 Lectures in iTunes 10.x

Note: While the following screenshots are from a Macintosh computer, the windows and features are nearly identical to those on a Windows computer.

2. Download the lecture files from iTunes U, STAT 208 Blog, or STAT 208 area in Blackboard (links to all are sources are available in Blackboard).

3. If the lecture files do not automatically appear or open in iTunes, you’ll need to add them to your library. Open iTunes and go to File → Add to Library… (Macintosh, left image) or File → Add File to Library… (Windows, right image) to browse for the file, select it, and add it to iTunes. Repeat this for each of the lecture files.

4. Once the lecture files have been added to iTunes, you should navigate to the one you want to view and double-click it to begin playing the lecture.

5. The lecture should appear in the “Now Playing” window in the lower left corner of the iTunes window (below the playlists). If you don’t see the “Now Playing” window, proceed to the next step to reveal the video portion of the lectures.
6. If you don’t see the “Now Playing” window, click the box with the triangle in it (bottom left of the window, as indicated in the image below).

7. You should now see the lecture playing in the “Now Playing” area (see below). If you want to view a larger version of the lecture video, continue to the next step.
8. If you click on the “Now Playing” image in the iTunes window, a new window will open to display the video. You can use the standard windows control options to enlarge this window and locate it on your screen as desired.

9. To jump to a specific slide in the lecture, you may use the “Chapters” menu to choose the desired slide. This is extremely useful if you just want to review a specific topic from your notes. [See the next step for another method.]
10. If you are viewing the lecture in its own larger window, you may jump to a specific slide in the lecture, you may use the “Chapters” menu button on the play-back controls.

11. If you use QuickTime Player instead of iTunes to view the lecture files, the playback controls are similar to those shown above.

Information on playing the lecture files on iOS devices is on the next page.
Watching STAT 208 Lectures on an iPhone or iPod Touch

The lecture podcast files should show the slide images when played back using the “Podcasts” app on an iPhone or on an iPod Touch. For some reason, the slide images do **NOT** display in the “iTunes U” app (or in other Apple apps) on the iPhone and & iPod Touch.

Once you have placed the lecture files onto your device (using whatever method you use to place music files onto your device), you may play them and jump to specific slides as in iTunes on your computer. You can even adjust the speed of the playback (faster or slower) by clicking the “1x” button on the controls. Tap the button in the upper-right corner (circled in red) to get the list of slides. Select the slide you want to jump to, and then tap the button in the upper-right corner again (now an image of the slide) to return to slide view.

STAT 208 Lectures on an iPad — Audio Only!

Slides don’t show for some reason in any of the apps (“Podcasts”, “Music”, or “iTunes U”) on an iPad. Perhaps this will change with an update in the future, but currently the iPad plays back audio only while displaying only the cover image.
